

## REMARKS

The Examiner's objection as to double patenting as to claims 1,2,9,23,24,32,32, and also claim 33 which is based on claim 1, are remedied by the submission of a terminal disclaimer to the cited prior patent. The other objections by the examiner as to form have been corrected.

In view of the amendment made above, Applicant hereby requests early reconsideration, allowance and issue of the present claims.

Should the Examiner have any suggestions to further clarify the claims of the application to render them more allowable, the Applicant's attorney would be most receptive to such.

Respectfully submitted,

---

Donn K. Harms
